Progressive Recovery of the Eurozone Economy

Strong Income Growth in 1H15

Very good Performance of the Operating Divisions

Strong Solvency and Capital Generation Capacity
Positive macro factors for the EU economy in 2015

- Depreciation of the Euro vs. USD benefitting exporting European corporates
- Drop in oil price should translate into higher disposable income for households and lower charges for corporates (IMF estimated benefit: ~+0.5% GDP)

Non-conventional measures by the ECB to re-launch economic growth

- TLTRO: massive additional liquidity favouring credit development in the Eurozone
- Quantitative Easing started on 9 March 2015
- Resulting in prolonged very low interest rates which will be favourable for investments

The “Juncker Plan”: a €315bn investment plan

- Allocated to long-term investments & SMEs/Mid-caps
