Strong Solvency and Funding
Focus on Senior Non Preferred Debt
The figures included in this presentation are unaudited. On 29 March 2016, BNP Paribas issued a restatement of its quarterly results for 2015 reflecting, in particular (i) an increase in the capital allocated to each business line to 11% of risk-weighted assets, compared to 9% previously, (ii) the charge of subordination costs of Additional Tier 1 and Tier 2 debt issued by the Group to the divisions and business lines, a review of the way it charges and remunerates liquidity between the Corporate Centre and the business lines and the adaptation of the allocation practices for revenues and operating expenses of Treasury activities within CIB, (iii) the allocation to the divisions and business lines of the contribution to the Single Resolution Fund, the reduction of the French systemic tax and new contributions to the deposit guarantee funds of BNL and Luxembourg Retail Banking which had been temporarily booked in the operating expenses of the Corporate Centre and (iv) some limited internal transfers of business activities and results. The 2015 quarterly result series have been restated reflecting these effects as if they had occurred on 1st January 2015. This presentation is based on the restated 2015 quarterly series.

This presentation includes forward-looking statements based on current beliefs and expectations about future events. Forward-looking statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future events, operations, products and services, and statements regarding future performance and synergies. Forward-looking statements are not guarantees of future performance and are subject to inherent risks, uncertainties and assumptions about BNP Paribas and its subsidiaries and investments, developments of BNP Paribas and its subsidiaries, banking industry trends, future capital expenditures and acquisitions, changes in economic conditions globally or in BNP Paribas’ principal local markets, the competitive market and regulatory factors. Those events are uncertain; their outcome may differ from current expectations which may in turn significantly affect expected results. Actual results may differ materially from those projected or implied in these forward looking statements. Any forward-looking statement contained in this presentation speaks as of the date of this presentation. BNP Paribas undertakes no obligation to publicly revise or update any forward-looking statements in light of new information or future events. It should be recalled in this regard that the Supervisory Review and Evaluation Process is carried out each year by the European Central Bank, which can modify each year its capital adequacy ratio requirements for BNP Paribas.

The information contained in this presentation as it relates to parties other than BNP Paribas or derived from external sources has not been independently verified and no representation or warranty expressed or implied is made as to, and no reliance should be placed on the fairness, accuracy, completeness or correctness of, the information or opinions contained herein. None of BNP Paribas or its representatives shall have any liability whatsoever in negligence or otherwise for any loss however arising from any use of this presentation or its contents or otherwise arising in connection with this presentation or any other information or material discussed.

2016 Supervisory Review and Evaluation Process (SREP) CET1 Ratio

- New CET1 ratio requirement following the SREP performed by the ECB: 8.0% in 2017 (phased-in)
  - Of which a G-SIB buffer of 1.0% and a Conservation buffer of 1.25%
  - Of which a Pillar 2 requirement (P2R) of 1.25%
  - Excluding a Pillar 2 guidance (P2G), non public
  - Phased-in CET1 ratio of 11.6% as at 30.09.16, well above the regulatory requirement

- Anticipated level of a fully loaded Basel 3 CET1 ratio requirement of 10.25% in 2019 (excluding P2G)*
  - Given the gradual phasing-in of the Conservation buffer to 2.5% and the assumption of a 2.0% G-SIB buffer
  - Will constitute the CET1 requirement taken into account** for the restrictions applicable to distributions (Maximum Distributable Amount – MDA)

- Target maintained of a fully loaded CET1 ratio of 12.0%

CET1 ratio already well above 2019 requirement

* Assuming P2R remains constant between 2017 and 2019 (reminder: SREP is carried out each year by the ECB which can modify each year its capital adequacy ratio requirements); ** As of 2019 (8% in 2017)
New Total Capital ratio requirement following the SREP performed by the ECB: 11.5% in 2017 (phased-in)

- Of which a CET1 ratio requirement of 8%
- And a Tier 1 capital requirement of 9.5%
- Phased-in Total Capital ratio of 14.4% as at 30.09.16, well above the regulatory requirement

Anticipated level of a fully loaded Total Capital ratio requirement of 13.75% in 2019*

- Given the gradual phasing-in of the Conservation buffer to 2.5% and the assumption of a 2.0% G-SIB buffer
- Will constitute the Total Capital requirement taken into account** for the restrictions applicable to distributions (MDA)

Target maintained of a Total capital ratio above 15%

- Tier 1 and Total Capital ratios requirements are on a cumulative basis
- Tier 1 and Total Capital ratios requirements now include the P2R but do not include the P2G

Target of ~1.5% of AT1 and ~2.0% of Tier 2

- Overall Capital instruments target > 3%

TLAC Adaptation for French G-SIBs

- Change under French Law in the hierarchy in liquidation and resolution context
  - To facilitate resolution and the respect of MREL/TLAC requirements
  - Preference to all creditors including the current holders of senior debt
  - Creation of a new category of senior non preferred debt which will rank junior to the current senior unsecured debt but in priority to subordinated debt
  - Law effective since 10 December 2016

- A clear and straightforward creditors hierarchy

- This solution is currently considered as a potential new reference framework for European Union*

*Proposal from the European Commission to modify the hierarchy of debt within the European Union (new Directive amending art 108 of BRRD)
Evolution of the Total Loss Absorbing Capacity (TLAC) Ratio

- **TLAC requirement of 20.5% in 2019**
  - Including Conservation buffer and G-SIB buffer

- **Target of a TLAC ratio of 21.0%**
  - Including ~5.5% of TLAC eligible debt to be filled with:
    i) the 2.5% MREL allowance* and
    ii) ~3% of senior non preferred debt

- **Targeted issuance of ~€10bn of senior non preferred debt each year until 01.01.2019***
  - To be realised within the usual medium/long term funding programme of about €25bn per year
